

MAKING BUSINESS SIMPLE

simplyservice

Reduce costs, increase profits. Increase efficiency. Work in real time. Deliver an infinitely better service for your clients...

...simple

This is how we do it...

SimplyService management is a field service management solution of integrated management and administration systems, created specifically to meet the demands of today's copier dealerships, with an automated meter billing function, field service management, repair and maintenance operation.

Its intuitive and flexible solutions provide the user with control, efficiencies and management of all SLAs, stock management, engineer management and demands of today's customer service requirements.

By utilising the latest internet technologies, SimplyService will have a huge impact of cost saving, time management and service department efficiencies. Designed to be flexible and modular, SimplyService management will enable the dealer to exercise the control and efficiencies required to meet your customer's expectations and to increase service department profitability.

By building the solution into bespoke modules, the whole package can be tailored to meet the current demands of any size service department, whether a new start up dealer or huge corporation. Customer data is held on the highest security level Amazon servers and so available for any device, in any location.

simplyservice

Features...

Service call management

Automated billing

Fault report

Account management

Stock usage

Basic reporting functions

Additional users and licences

Advanced automated billing

Advanced stock management

Customer remote access

Advanced reporting

Advanced call management

Advanced billing +

Stock management +

Advanced reporting +
